Kensington Roller Shade Program Summary

Roller Shades

- Roller Shades are traditional window coverings that offer countless decorative options.
- Ideal for all areas of the home, this product works well alone or with other window treatments.
- All fabrics may be used as Roller Shades and are marked with this logo.

Fabrics

- This collection features various fabric styles and trends.
- Fabrics include: Screen Fabrics, Natural Fabrics, FR, and Room Darkening options.
- Various opacity and color options are sure to fit your décor needs.

Options

- Customize your shade order with mix and match options:
Valance and Cassette, Hems and Trim, and Roller choices.

Hardware

- Kensington Roller Shades use Rollease® hardware systems.
- Each clutch will provide ease in operation and years of trouble free use.
- Every Kensington Roller Shade comes with a heat sealed bottom hembar.

*Sagging may occur with used as Roman Fabric.

**Pattern orientation on Railroad Fabric will run length for width. Fabrics may cup no the sides when railroaded.

FABRIC/PRODUCT SPECIFICATIONS

FABRIC ORIENTATION

The fabrics used to make roller shades are of a limited width (see collections chart).

- Ordered shades that are within the maximum width of the fabric will be made with the fabric vertically oriented (Fig. 1).

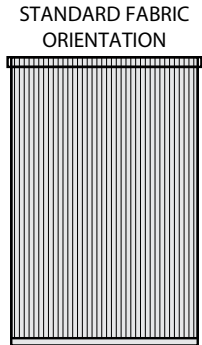

Fig. 1

- Ordered shades that are wider than the maximum fabric width will be made with the fabric turned width for height (horizontally oriented) (Fig. 2). This only applies to fabrics that can be turned width for height (railroaded).

Fig. 2

- Ordered shades that are larger (both width-wise and height-wise) than the maximum fabric width will be made with a visible seam. (Fig. 3). This only applies to fabrics that can be turned width for height (railroaded).

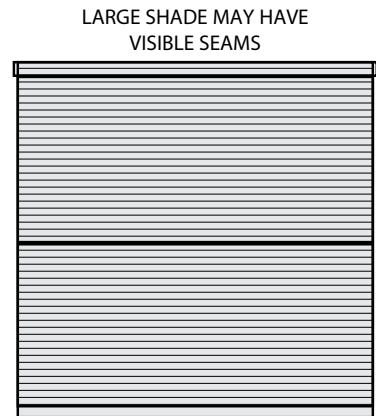

Fig. 3

FEATURES AND OPTIONS

DESIGN OPTIONS - ROLLER

PLAIN HEMS

With plain hems, the fabric wrapped bottom rail is the bottom of the shade.

Plain hems are often the preferred way to finish the bottom of the shade when it is important to minimize light leakage on inside mounted applications. Decorative hems, particularly styles like Florence and Chalet, can leave light gaps between the sill and the trim even when the shade is in the fully lowered position.

DECORATIVE HEMS

In addition to plain hems (Fig. 4a), there are seven decorative hem styles offered to enhance the appearance of the bottom of the shade. These decorative styles (Fig. 4b), are available for all fabrics with few exceptions.

The hem styles extend the fabric below the bottom rod of the shade. The Waterford Double pattern extends approximately 8" below the bottomrail. All other patterns extend about 6" below the rail.

When a decorative hem is used with outside mounted shades, be sure to allow sufficient overlap of the bottom sill to prevent light gaps.

PLAIN HEM
Heat Sealed

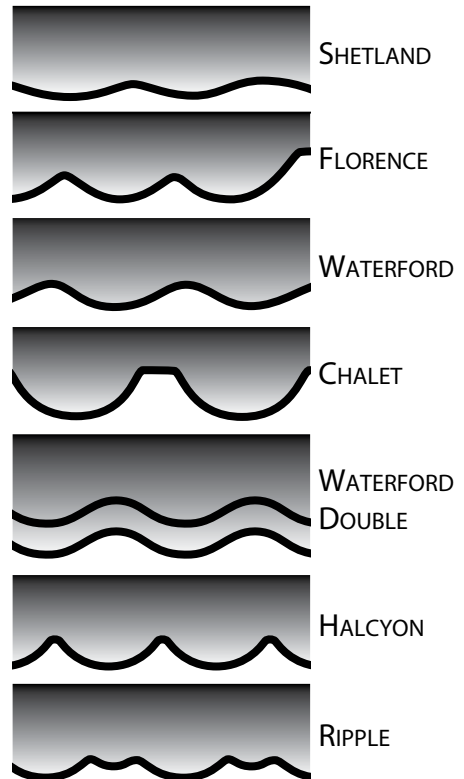

Fig. 4b

FEATURES AND OPTIONS CONTINUED

TRIMS

Decorative trims are available to accompany a plain or decorative hem. Colors are available to coordinate with the whole fabric collection. (This option is not available for screen patterns such as Siena, Lauren, Lumen, Terra, NordicScreen and Elegance.)

Standard Trim style

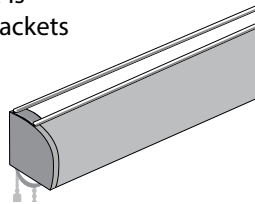

Available Colors:

- | | | |
|------------------|------------|---------------|
| Polar White M600 | Beige M602 | Nickel M603 |
| Ivory M601 | Coco M206 | Midnight M205 |

DESIGN OPTIONS

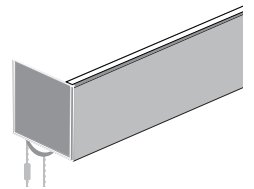

CASSETTE OPTION WITH OPTIONAL FABRIC INSERT

- A traditional option available with every Roller Shade.
- The fabric optional wrapped cassette is rounded and covers the roller and brackets for a clean, coordinated look.
- Available in your choice of White, Ivory, Black, Bronze and Anodized Aluminum.
- If you have a clutch color preference, please specify on order, otherwise your fabricator will choose based on your fabric decision.
- Some fabrics are not available as a fabric insert. Please contact your fabricator for details.

FASCIA OPTION

- Contemporary option available with every Roller Shade.
- The square aluminum fascia covers the roller and brackets for a clean, sophisticated look.
- Available in your choice of Ivory White, Black, Bronze and Anodized Aluminum.
- If you have a clutch color preference, please specify on order, otherwise your fabricator will choose based on your fabric decision.

SYSTEM OPTIONS

CORDLESS

This ultra safe option functions the same as a standard clutch but uses no chain control (Fig. 6). A great option for children's rooms or any room with child or pet traffic.

Spring Assist

Lifts shades previously only operable using motorization. Reduces pull force to approximately 6lbs on shades weighing up to 30 lbs when using our standard spring assist. It's sleeved spring provides smooth quiet operation. Works with R-Series and Skyline Clutch systems with no special brackets or end plugs required. Minimum 60" width. Delaer Net Cost \$80.00

LIGHT CONTROL

Opacity

- Our fabrics allow varying degrees of light into your room, depending on the pattern you choose.
- Some sheer and screen fabrics such as Lumen and Elegance allow full light access to your room during the day.
- Room darkening pattern options such as Timeless and Dover keep your room dark and block most of the sunlight.
- Choose the fabric by finding the opacity level you desire. Opacity levels vary from 1, being the most sheer to 5, which allows for complete blockage.

Look for the opacity scale on the back of every fabric divider.

FINISHED DIMENSIONS & RAIL MEASUREMENTS

The Roller Shades Collection shades are designed to fit rectangular window openings in a vertical orientation. The maximum width and height of the shades depend on whether the fabric can be turned width for height (railroaded), as shown on page 3 size standards chart. The shades are installed inside or outside the window opening, or mounted to the ceiling.

DEDUCTIONS & MOUNTING INFORMATION

(See price grids for information by fabric.)
FABRIC ORIENTATION

12"
 72" to 118" (depending on fabric)

INSIDE MOUNT 120"

NOTE: If possible, when a wide shade is ordered, all shades in the order made with the same fabric will be cut width for height for the best possible match.

STANDARD FACTORY DEDUCTIONS

(All allowances are taken from ordered dimensions and may vary by 1/8.)

Inside Mount	less 1/4"
Outside Mount	ordered width
Inside and Outside Mount Fabric	ordered width less 1 1/8"

NOTE: Size clutch will be determined by your fabricator.

FACTORY DEDUCTIONS WITH FASCIA

Inside Mount Fabric	ordered width less 1 1/4"
Inside Mount Profile	ordered width less 1/4"
Outside Mount	ordered width

STANDARD MOUNTING REQUIREMENTS

Minimum Mounting Depth	5/8"
Flush Mount	2"
Minimum Flat Vertical Surface	5/8" x 1 3/8"

Cassette size will be determined by your fabricator unless otherwise specified.

MOUNTING REQ. WITH CASSETTE

Minimum Mounting Depth	2 1/4"
Flush Mount	4"
Minimum Flat Vertical Surface	3 3/4"

NOTE: Minimum mounting and flush mount depth varies with the diameter of the fabric and cassette sizes.

INSTALLATION BRACKETS

Traditional brackets are used without the cassette. These brackets come with a custom flag locking mechanism to ensure a sturdy hold on your shade. Cassette brackets are spring clips which provide the option of a mount from the top or back of the cassette. Fascia brackets are box brackets.

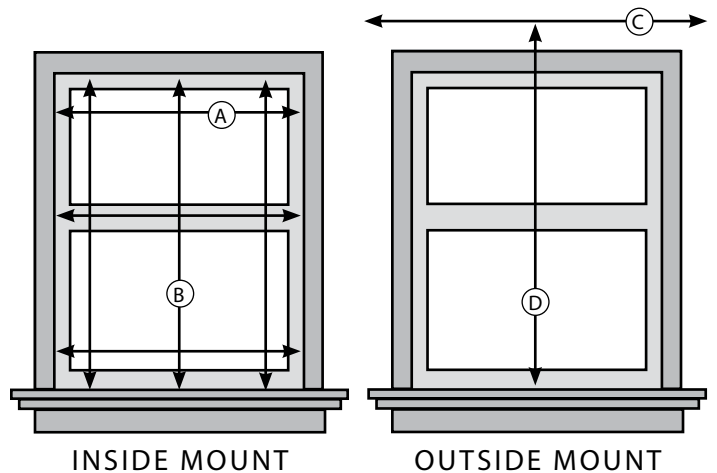

MEASURING INSTRUCTIONS

INSIDE MOUNT

Use a steel tape to measure the opening width **A** at three different places, and use the narrowest dimension when ordering. Be exact! The factory will make the shade 1/8" narrower so it will not rub against the window casing. Measure the height **B** of the window from the top (Soffit) down to the sill.

OUTSIDE MOUNT

Use a steel tape to measure the exact width **C** and height **D** of the area to be covered. It is recommended that the shades overlap the window by at least 1/2" on each side. When installation has no sill, allow the shade to overlap the bottom of the window casing by at least 1/2". Shade fabric will measure the width and height indicated on the order form.

R-Series Installation

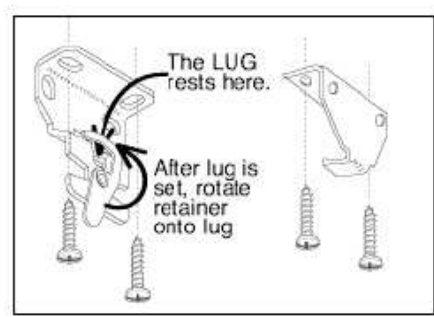

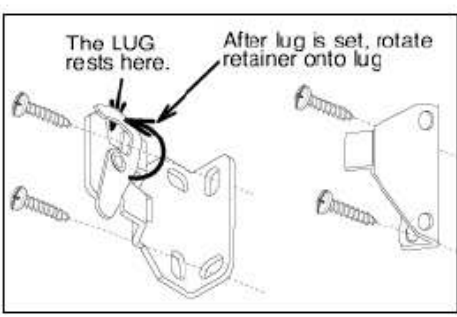

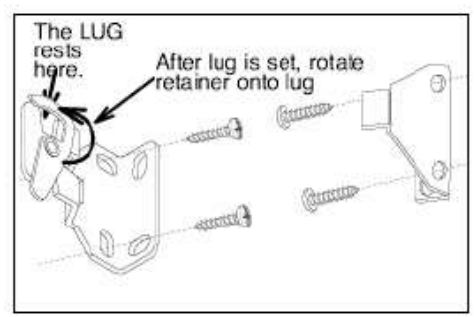

1. MOUNT THE BRACKETS.

If the clutch is on the right end of the shade, attach the brackets to the window frame, window molding, wall or ceiling, as shown below. If the clutch is on the left end of the shade, reverse the bracket positions, left for right.

TO THE INSIDE OF THE WINDOW FRAME

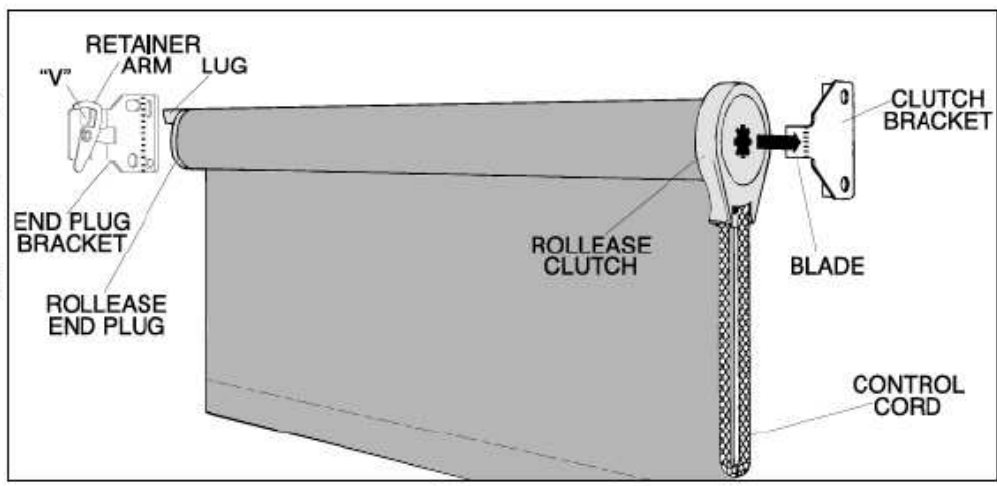

TO THE WALL OR TO THE FRONT OF THE WINDOW MOLDING

TO THE CEILING OR TO THE TOP OF THE WINDOW FRAME

2. INSTALL THE SHADE.

- a. Push the clutch straight onto the blade of its bracket. The bottom of the clutch should always point straight down.
- b. Lower the lug of the end plug onto the "V" of its bracket. The roller should fit in the brackets securely, with just a little play. Rotate the riveted retainer portion to lock the lug in position.

3. INSTALL THE TENSION DEVICE

See page R30 for details

4. USE THE CONTROL CORD TO OPERATE THE SHADE.

Pulling gently on the cord in one direction raises the shade; pulling it in the other direction lowers it.

On shades where the fabric rolls against the window, the front cord does the raising. On shades where the fabric rolls toward the room, the rear cord does the raising.

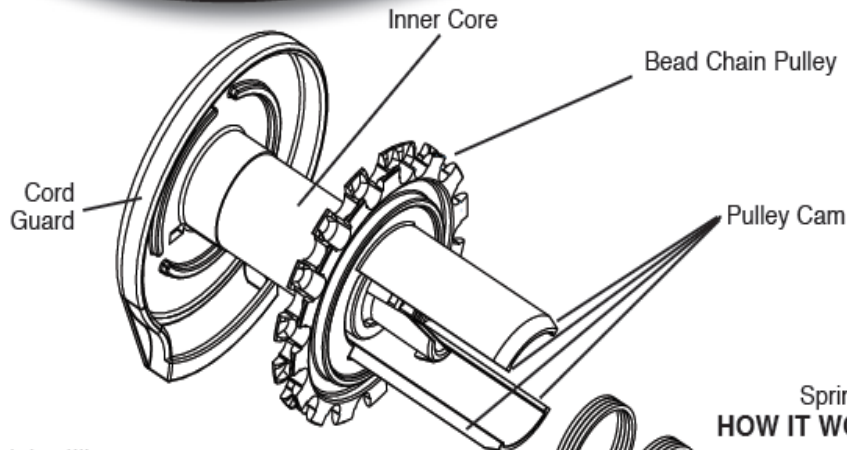

5. ATTACH STOPS TO A CONTROL CORD THAT'S MADE OF BEAD CHAIN.

On metal bead chain, attach a metal stop ball that is at least 5/16" (8mm) in diameter, so that it touches the mouth of the clutch when the shade is in the all-rolled-up position.

For metal or plastic bead chain, lower the shade to sill or floor height, and attach the appropriate metal stop or plastic connector next to the clutch, this prevents the shade from being lowered beyond that point.

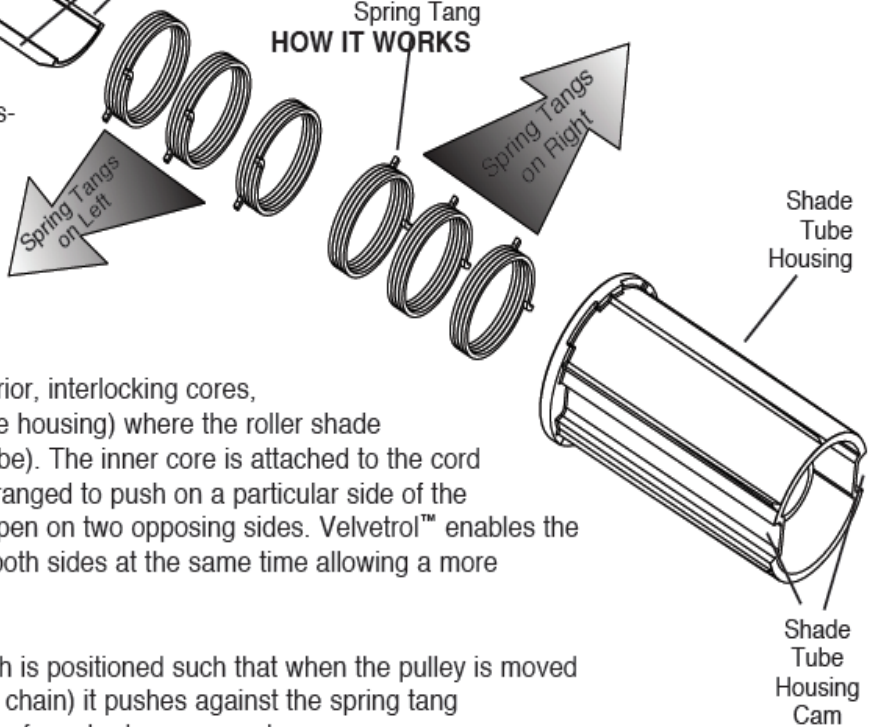

RollEase®

Technology inside the Skyline™ clutch

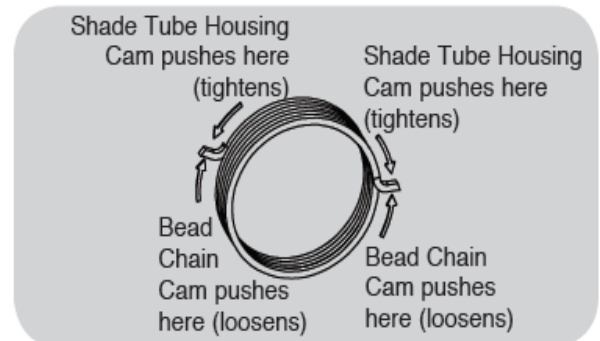

A clutch utilizes a wrap spring which can either be tightened or loosened on an inner core. Push on one side of the spring tang and the spring diameter decreases locking the clutch and preventing any movement. Push the tang on the other side and the spring opens, allowing free movement.

HOW IT WORKS

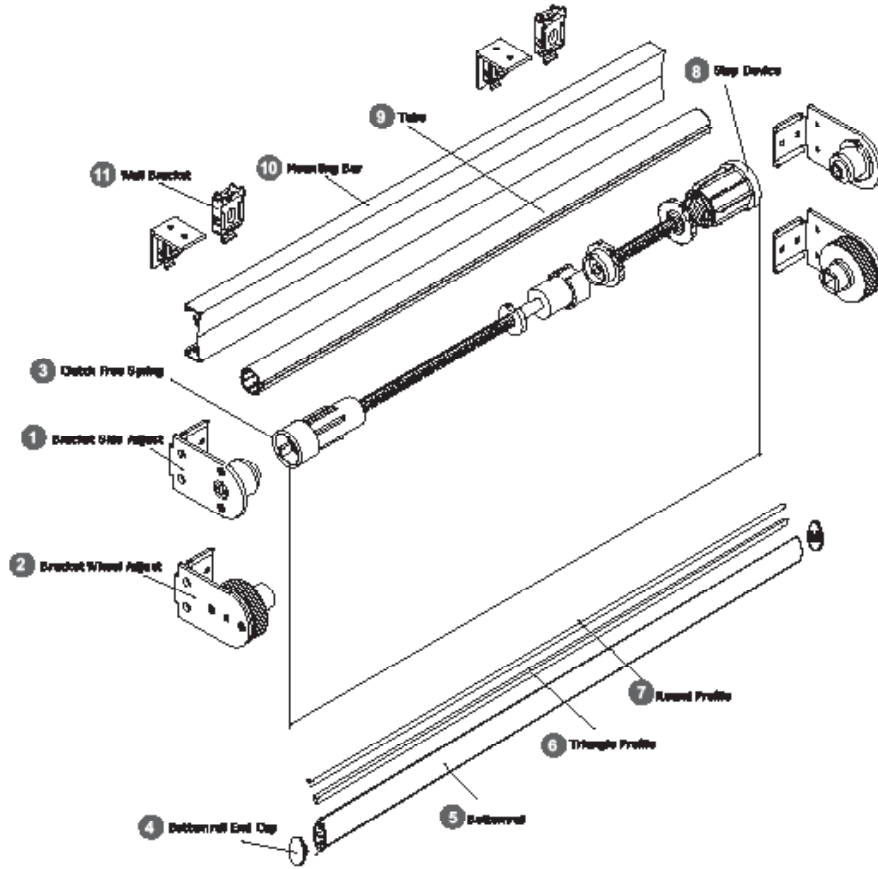

The clutch is divided into two separate interior, interlocking cores, the first of which on the outside (shade tube housing) where the roller shade tube is attached (fabric is rolled onto the tube). The inner core is attached to the cord guard. Both cores have cams which are arranged to push on a particular side of the spring tang. With Velvetrol™, this core is open on two opposing sides. Velvetrol™ enables the spring tangs to apply a balanced force on both sides at the same time allowing a more smooth and even distribution of forces.

- The pulley has a cam on both sides which is positioned such that when the pulley is moved in either direction (by pulling on the bead chain) it pushes against the spring tang opening the springs diameter and allowing free shade movement.
- Release the bead chain and the spring automatically returns to its original, closed shape, locking the shade in position.
- The shade tube housing has a cam positioned so that the force of the hanging shade pushes on the side of the spring tang locking it to the inner core. The weight of the shade helps keep the shade locked. The more weight on the shade, the tighter the spring locks.

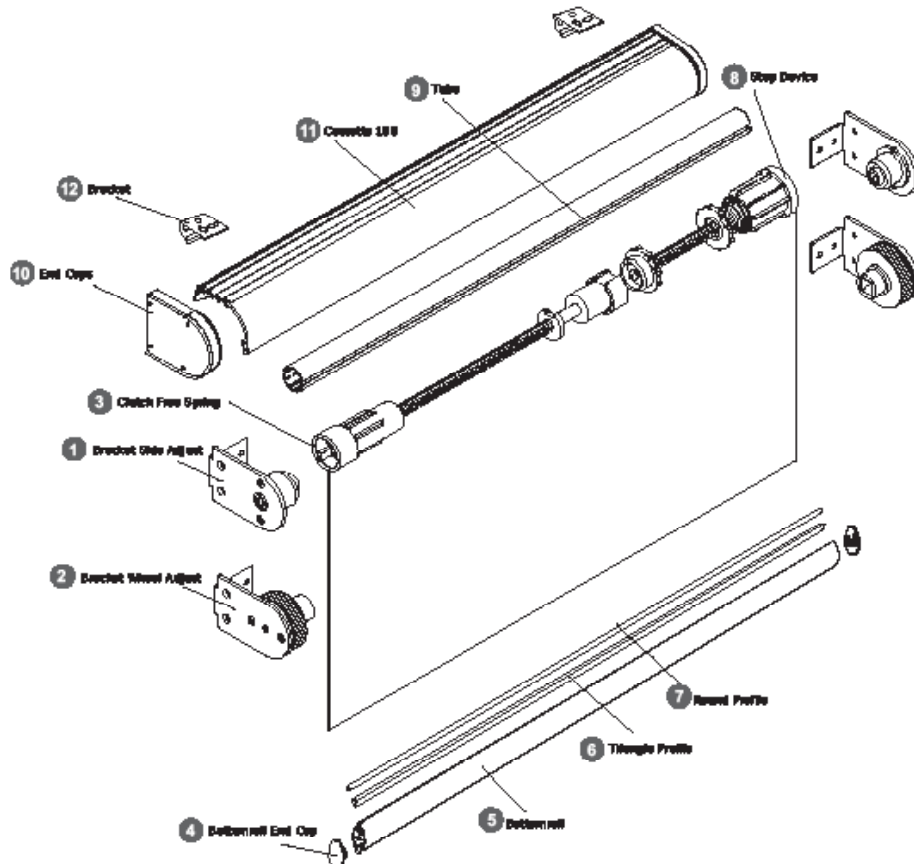

RollEase's patented, balanced core Velvetrol™ multi-spring configuration distributes the interior forces evenly over the inner core and offers the industry's smoothest pull. The ratio between the bead chain pulley and the shade tube provides a mechanical advantage allowing the pull forces to raise a shade to be less than the actual weight of the shade.

CORDLESS ROLLER SHADE WITH MOUNTING BAR

CORDLESS ROLLER SHADE WITH CASSETTE

CHILD SAFETY

Our Kensington Roller Shades are designed with child safety as a priority. To reduce the risk of strangulation our fabrication methods incorporate features to comply with the current ANSI cord safety standard. Fabrication methods include tension devices.

For Kensington Roller shades made with a clutch operating system our tension device is designed and is to be placed and shipped so that, unless it is properly installed (or altered from the shipped condition with sequential process or tools), it prevents the shade from operating. The tension device once installed can help prevent children from pulling cords around their necks.

CARE AND CLEANING

- Roller Shades are specially treated to repel dust and dirt.
- Dusting: Regular dusting maintains a like-new appearance.
- Vacuuming: For deeper cleaning, vacuum gently with a furniture brush attachment of any vacuum cleaner.
- Spot-Cleaning: Spot-clean shades with soft cloth or sponge moistened with lukewarm water. Add mild detergent if needed. Blot gently and dry shade in fully lowered position.

LIFETIME LIMITED WARRANTY

Kensington warrants that Kensington Roller Shades will be free from defects in materials and workmanship for as long as the original retail purchaser owns the product, provided that products were properly installed in residential dwellings and products were made or assembled exclusively from Kensington materials and components.

The obligation of Kensington, its fabricators and distributors is limited to repair or replace the shadings or components found to be defective, and excludes shipping charges and labor costs for measuring, fabricating and installation. Repairs will be made with like or similar parts.

This warranty does not include any conditions or damages resulting from accidents, alterations, exposure to elements (which could cause, among other things, the fading of shade colors), misuse, abuse, motorized devices, or failure to follow our instructions with respect to measurement, installation, cleaning or maintenance. This warranty does not cover damage to shade fabrics as a result of using window cleaners or similar substances, which could cause discoloration of the shades. This warranty does not cover any condition or damage resulting from removal of the shade and reinstallation in the same or another window.

This warranty does not apply to conditions caused by normal wear and tear upon the product.

THIS WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER OBLIGATIONS, LIABILITIES OR WARRANTIES.

In no event shall Kensington, or its licensed fabricators or distributors, be liable or responsible for INCIDENTAL OR CONSEQUENTIAL DAMAGES or for any other direct or indirect damage, loss, cost, expense or fee. Some states do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion or limitation may not apply to you.
