

SELECT WOVEN WOOD

PRODUCT REFERENCE AND PRICE GUIDE

MAY 15, 2025

ABOUT THE COLLECTION

The Walden Select Collection includes contemporary patterns, with bamboos that have been re-imagined for modern decor, woven jutes in trending gray and white color choices, and soft, natural fabrics.

Using natural shades in your design is a subtle way to bring the timeless beauty of nature into your space.

Shades incorporate natural fibers like bamboo, jute, and ramie into their weaves, which are selected based on color and luster. Materials are hand processed and woven into shade fabric. Finished fabrics highlight the textures, colors, and qualities of the natural materials used to create them.

After drying and quality review, fabrics are then sewn and constructed by hand into finished shades.

All the patterns in the collection can be made into roman shades or sliding panels. Many can be made into folding doors.

Natural shades are as functional as they are beautiful with several customization options including the ability to tailor your light and privacy preferences with various liner and shade styles.

The collection has three unique cord-free control options: our patented cordless system that can lift even the heaviest shade on a 1½" head rail and our affordable, versatile wand and remote control motorization options.

Our Limited Lifetime Warranty covers all aspects of workmanship and quality in your shades.

BO09	Espresso	100% Polyester
BO01	White	100% Polyester

Light-filtering liners are the same color on both sides. Black-out liners are off-white to the street.

*Black liners wider than 53" will be seamed.

SHADE STYLES

FABRIC SELECTION

The fabrics in this collection are made from natural materials, which are subject to variation in color, texture, and weave. Like any wood or bamboo product, fabrics may show natural color changes over time.

Natural fabrics are not ideal for rooms with excessive humidity like bathrooms. Shades installed in these environments may bow or twist over time.

STANDARD ROMAN SHADE

Shade material is attached to the back of the head rail. Shade includes a 6" valance to conceal the components. When raised, the material rises from the bottom in flat folds.

Shades operated by cord loop will have controls in front of the shade.

WATERFALL SHADE

Shade material is attached to the front of the head rail, without a valance. When raised, the material rises from the bottom in flat folds. Optional back valance is available upon request.

Shades operated by cord loop will have controls behind the shade.

VALANCE RETURNS

Outside mount shades are recommended to be ordered with valance returns. Returns for both outside and inside mount shades are available free of charge if requested at the time the order is placed.

Standard valance returns are made using the shade material. Valance returns can also be made using edge binding material upon request; this is a surcharge option.

Standard valance return height will be 1½" less than the valance height. This length will keep the rolled bottom of the valance from interfering with the return.

Optional short valance returns are also available. Short returns cover the end of the head rail and hide the components, keeping the stack of the raised shade away from the returns.

Custom valance return lengths are available to be ordered upon request.

All valance returns will be made with an L-shaped connector to attach to the back of the valance. This holds the returns in place and creates a clean, finished corner.

Standard Valance Return

Short Valance Return

BOTTOM BAR

Clutch and motorized shades will be made with a round bottom bar. Cordless shades are made with a rectangular bottom bar.

SHADE OPTIONS

LINERS

A liner can be ordered attached to the back of the shade or as a separate operable, movable liner (see Twin Shade below).

ATTACHED LINERS

Attached liners are available in light-filtering or black-out. They are secured to the back of the shade by stitches at each side of the liner. If a shade is lined, the valance will automatically be lined with the same material.

TWIN SHADE

A twin shade features two separate, independently operated shades on one head rail. The front shade can be either a standard or waterfall natural woven shade.

A separate liner shade is attached to the back of the head rail and both shades operate independently.

Outside mount twin shades will be made with a valance that is $\frac{3}{4}$ " wider than the ordered shade width. This will allow the returns to fit behind the valance.

See Specifications for head rail sizes.

Not available as 3-on-1 headrail.

TOP-DOWN BOTTOM-UP SHADES

Top-down bottom-up (TDBU) shades can be raised from the bottom or lowered from the top. To conceal shade components, shades will be finished with a black-out lined front valance and a back valance. Back valance will match shade material for unlined shades or liner material for lined shades.

Outside mount TDBU shades will be made with a valance that is $\frac{3}{4}$ " wider than the ordered shade width, allowing the returns to fit behind the valance.

TDBU shades are not available in waterfall style, as 3-on-1 head rail, or as twin shades.

Only available with cordless control.

MULTIPLE SHADES ON ONE HEAD RAIL

shown with two shades

Shades are available with 2-on-1 or 3-on-1 head rail. The maximum total width is 108" and the gap between shades will be no more than $\frac{1}{2}$ ". The maximum width for a common valance is 96"; wider valances will be made in sections to match the individual shade widths.

Clutches, cordless, wand, and remote control options can be used for these shades. Make sure there are suitable locations for chain tensioners when specifying multiple shades on one head rail. 3-on-1 head rail is not available for top-down bottom-up shades or shades with movable liners.

SHADE CONTROL OPTIONS

CORDLESS SHADES

Cordless shades operate with no lift cords on the front of the shade. The shade is lowered by pulling on the hem bar. A spring control system, located under the wooden head rail, holds the shade in place at any desired position.

Clear grips are added to the hem bar of cordless shades; one per shade up to 72" wide and two for wider shades.

Cordless shades are available up to 96" wide and 96" long and will be mounted on standard depth head rails (see Specifications for details).

CLUTCH CONTROLS

Clutches provide an assisted lift for large or heavy shades and come standard with color-coordinated cord loops available in one foot increments from 2' to 6'. The factory will choose the length closest to 2/3 the shade height, unless otherwise requested. Nickel-plated bead chain loops are available as a surcharge option and can be made to custom lengths.

Compliant cord tensioners are provided with clutch control shades. Cord tensioners secure the cord loop to the wall or window. They must be installed for the shade to be compliant with safety regulations and to operate properly.

Standard shades ordered with a clutch come "clutch adjacent" to keep the stack of the raised shade from interfering with the loop. This means the shade fabric will be narrower than the ordered width on the control side, allowing the cord to hang to the side of the shade (see diagram). This may cause a light gap on black-out shades.

Waterfall shades ordered with clutch controls will have control loops behind the shade and are not available to be ordered as clutch adjacent.

SHADE CONTROL OPTIONS

WAND CONTROL SHADES

Wand control motorized shades are powered by a rechargeable lithium-ion battery. The motor is controlled using a wand which hangs down to the side of the shade.

Waterfall shades are not available to be ordered with wand control.

Wands are available in 4 lengths: 24", 36", 48", and 60".

Available colors include: white, beige, gray, bronze, and black.

Wand control shade motor batteries are recharged via a mini USB power adaptor which plugs into the end of the wand.

All wand control shades will be made with shade fabric narrower than the ordered width on the control side, allowing the wand to hang to the side of the shade. This may cause a light gap on black-out shades.

SHIPPING & HANDLING

\$10.00 handling per unit. Minimum \$25.00 per order.

Mid-Size shipping (60" up to 94") \$40.00 per order

Oversize 94" and over, \$290.00 per order

For express shipment, shipments to Alaska, Hawaii and foreign countries, full shipping charges will be added to your invoice.

Inspect all shipments immediately and carefully. Please report damages and shortages on the delivery receipt and notify Oxford House customer service within 48 hours. No freight damage claim will be accepted after 10 days from

SHADE CONTROL OPTIONS

REMOTE CONTROL SHADES

Remote motors have rechargeable and hardwired options available which can be controlled with remotes, wall switches, or motor hubs.

See Specifications for minimum widths by motor type.

Connects through 2.4 GHz wifi or directly to router with ethernet cable.

Works with Connector+ App, Amazon Alexa, Control4, Google Home, IFTTT, RTI, Samsung Smart Things, and Siri Short Cuts.

Pro Hub

SHADE ADDITIONAL OPTIONS

LINED VALANCE (STANDARD AND TDBU SHADES)

Lined valances are included to conceal the head rail components where an open-weave pattern is selected.

BACK VALANCE/INTERIOR VALANCE (WATERFALL SHADES)

Back valances for waterfall shades are available upon request and can be ordered in either the shade fabric or the liner fabric for lined shades. Back valances conceal the shade components from the back of the shade.

Interior valances come standard with waterfall shades that are unlined or that are ordered with a light-filtering liner. Interior valances block the outline of the shade components from showing on the front of the shade. Valances are 4" long and are made with black-out White (BO01) liner material. Because the valance is made with black-out fabric, the part of the shade in front of the interior valance will look darker than the rest of the shade when light is coming through.

Waterfall Shade
with interior and back valances

Shade with Light-Filtering
Liner and Interior Valance

EDGE BINDINGS

Edge binding is available for all patterns in the Walden Select Collection.

Edge binding is applied to the sides of both the shade and valance. It is not applied to the bottom of either.

Edge bindings are available in eight colors. Edge binding will show 5/8" on the face of the shade.

Some patterns are required to be ordered with edge binding, as noted in the Materials Reference table. Patterns that require edge binding have the cost of edge binding included in the base price of the shade and will have the warranty for frayed edges voided if ordered without edge binding.

Shade with Edge Binding

SHADE ADDITIONAL OPTIONS

CUT OUTS

Cut outs can be taken from either side of the shade. Exact dimensions and the locations of the cut outs are required.

Cut outs are not available with edge binding.

There may be limitations to what can be cut out, based upon the size and specifications of the shade. The factory will review all orders for cut outs and provide confirmation of each order within 24 hours.

HOLD DOWN BRACKETS AND SPACER BLOCKS

Hold down brackets are supplied upon request for all control types. Clutch and motorized shades ordered with hold down brackets will be made with a round bottom bar. Cordless shades with hold down brackets will be made with a rectangular bottom bar.

Spacer blocks measuring 3/8" are available upon request. Maximum of 2 spacer blocks per bracket recommended.

VALANCE ONLY

Valance Only is available for all fabrics. Valances can be specified in length up to 18" long and have a maximum width of 96". Valance returns will be made to the ordered length of the valance or can be requested in custom lengths.

Valances can be ordered attached to a head rail or loose. Available head rail depths for attached valances are:

1", 1½", 2½", 3 ⅜", 4", or 5½".

Valances can be made with liners and edge binding for a surcharge. Please specify if valances should be lined or unlined or made with or without edge binding when placing your order.

TWIN SHADE W/2 MOTORS Controls Same Side (shown) or Opposite Sides

FOLDING DOORS

Check the Materials Reference table for patterns which are available to be made as folding doors.

Folding doors are ideal for large windows or doors and are suspended vertically from hangers, which slide smoothly inside an aluminum track. On each side of the door are wood bars with handles. The wood bars come in six colors and either a brown or white track. Wood bar and track colors are selected to coordinate with the chosen pattern.

Folding doors come in one of two configurations: one-way opening or center opening.

ONE-WAY OPENING

When open, the material stacks back either to the right or the left. Specify on the order form which side of the door the drapery will stack to.

NOTE: If you want the material to stack back completely clear of the window, for an unobstructed view when the door is open, allow for the width of the stack in the overall width of the door. See "Specifications" for more details.

CENTER OPENING (SPLIT DRAW)

The door is made from two panels, which are equal width and meet in the middle. They open to opposite sides of the window.

Each panel has a wood bar on both sides and the two middle bars have small, countersunk magnets which hold the two bars together tightly when the panels are in the closed position.

DRAPERY STYLE

Folding doors can be ordered "drapery style," which means no edge bars. Instead, they will have edge binding on all four sides of each panel for a softer look. Wide edge binding will be used on the top, bottom, and sides of the panel.

Drapery style folding doors can also be ordered as one-way or center opening.

One-Way Left Stack
shown with valance

Center Opening - Split Draw
shown with valance

Drapery Style Left Stack
shown with valance

FOLDING DOOR OPTIONS

FULLNESS

The standard folding door comes with 5% fullness, which means that it lies nearly flat when fully extended. Folding doors can be ordered with 20% fullness, which gives fuller folds; this is a surcharge option.

5% Fullness (fully extended)
shown with valance

20% Fullness (fully extended)
shown with valance

LINERS

Liners are available in light-filtering or black-out. They are attached to the top of the folding door and are secured down both sides beneath the wood bars or edge binding.

VALANCE

Standard folding doors come with track and panels. Adding a valance provides a decorative touch. It also conceals the track and hangers and blocks any light gap between the track and the top of the door fabric.

The valance is 8" long and is mounted to a wooden board, 5 1/2" deep and 3/4" thick. The valance is attached to the front edge of the board by velcro.

The valance is oriented in the same direction as the door (vertically) and is edge-bound on the top and bottom. Narrow edge binding is standard on folding door valances.

For inside mount shades, the valance will cover the front of the valance board only. For outside mount shades, the valance will be made to wrap around both ends of the valance board.

Center Opening – Split Draw
shown without valance

Valance

FOLDING DOOR SPECIFICATIONS

SIZE LIMITATIONS

Minimum Width: 24" Minimum Height: 24"
Maximum Width: 192" Maximum Height: 96"

Tracks and valance boards wider than 94" are spliced to avoid oversize freight charges.

DOORS WITHOUT A VALANCE

For doors without a valance, the height of the folding door is measured from the top of the track to the bottom of the fabric.

There is a gap of approximately $\frac{3}{4}$ " between the top of the track and the material. The factory will deduct this amount from the ordered length when they make the fabric panel.

DOORS WITH A VALANCE

For doors with a valance, the height of the folding door is measured from the top of the valance board to the bottom of the fabric.

The valance board is $\frac{3}{4}$ " thick and there is $\frac{3}{4}$ " between the top of the track and the top of the material. The factory will deduct $1\frac{1}{2}$ " from the ordered length when they make the fabric panel.

INSIDE MOUNT MEASUREMENTS

Minimum Inside Mount Depth: 2"

Check for any obstructions, such as trim or handles that may interfere with the opening and closing of the door.

Inside Mount Deductions:

Width: $\frac{1}{4}$ "

Height: $\frac{3}{4}$ "

No deductions are made to the width or height of outside mount doors.

STACKING CHART (5% FULLNESS)

WIDTH	STACK
36"	8 $\frac{1}{2}$ "
42"	9"
48"	9 $\frac{1}{2}$ "
60"	11"
72"	12"
84"	13"
96"	14"

Center opening (or split draw) folding doors will open into two equal stacks on each side. For example a 96" center opening will have two stacks, each the size of a 48" one-way opening door: 9 $\frac{1}{2}$ ".

20% fullness folding doors will stack approximately 1" wider for small doors and $1\frac{1}{2}$ " wider for larger doors than same size at 5% fullness.

All stacking dimensions are approximate and will vary by pattern.

SLIDING PANELS

SLIDING PANELS

Sliding Panels are fabricated using the Absolute Panel system by Coulisse.

Sliding panels provide a clean, contemporary look for large windows and doors. Overlapping panels are suspended from hangers, which glide smoothly on an aluminum track and pass in front or behind each other, allowing panels to stack away from the window.

Panels can be pulled open and closed with a clear acrylic wand. Panels are custom-sized, based on the ordered width and the number of panels.

OPENING OPTIONS

ONE-WAY

When open, panels stack to either the right or left. Specify on the order to which side of the window the panels will stack.

The standard configuration is for the back panel to be stationary and all the other panels stack in front. Reverse stacking is available, with the front panel stationary. Free-floating panels are also available.

CENTER OPENING (SPLIT DRAW)

Must be made with an even number of panels. Panels stack to both sides.

Standard configuration is the back panel on both sides to be stationary and all other panels to stack in front. 4 panel center opening can also be requested on a 2 channel track, which allows a more narrow mounting depth. See Sliding Panel Configurations on page 23.

Reverse stacking and free-floating panels are also available.

NOTE: If you want the panels to stack completely away from the window for an unobstructed view, allow for the panel width in the overall width of the shade. See Specifications for more details.

One-Way LEFT Stack

Center Opening (Split Draw)
shown with 2 channel track

SLIDING PANEL INSTALLATION AND CONSTRUCTION

TRACK INSTALLATION

Tracks are installed using either a top mount or face mount bracket. Both bracket options have a flange which is inserted under the lip of the track and a tab which the track snaps into to hold the sliding panel track in place.

Tracks and brackets are available in white or silver.

PANEL INSTALLATION

Panels are suspended by a Velcro top rail, which slots into the track runners. See Panel Installation on page 22 for illustration.

Velcro top rail and Runner

Velcro Top Rail

BOTTOM BAR

Sliding panels will be finished with a flat, fabric wrapped bottom bar.

SLIDING PANEL BOX VALANCE

VALANCE BOARD

Sliding panels can be ordered with a valance board, which installs above the sliding panel track.

Valances can be installed either direct mount if top mounting or using an L-bracket when face mounting. Sliding panel tracks will be installed to the underside of the valance board.

Valance boards will be matched to the color of the fabric used for the sliding panel.

When ordered inside mount, valances will attach to the front of the valance board only with no returns. When ordered outside mount, valances will include enough fabric to cover the front and sides of the valance to create a clean corner.

Valances will have fabric railroaded.

The height of the sliding panel is measured from the top of the valance board to the bottom of the sliding panel. The valance board is 3/4" thick, and the factory will account for all required deductions.

The depth of the valance board is based on the number of tracks the sliding panel will have. See chart below.

Outside Mount Valance Board
shown with return

VALANCE BOARD DEPTH

	2 CHANNEL	3 CHANNEL	4 CHANNEL	5 CHANNEL

SLIDING PANEL SPECIFICATIONS

SIZE LIMITATIONS

Minimum Width: 48" Minimum Height: 24"
Maximum Width: 192"* Maximum Height: 120"

*Tracks wider than 94" are spliced to avoid oversize freight charges. If you prefer one continuous track, please call for a freight quote.

DEDUCTIONS

IB Deduction (Width): 1/4"
IB Deduction (Height): 1/2"

No deductions are taken for outside mount.

TYPICAL PANEL WIDTH (OUTSIDE MOUNT)

Width	One-Way Draw		Center Opening	
60"	3 panels	21 5/8"	4 panels	16 7/8"
72"	3 panels	25 5/8"	4 panels	19 7/8"
84"	3 panels	29 5/8"	4 panels	22 7/8"
96"	4 panels	25 7/8"	4 panels	25 7/8"
108"	4 panels	28 7/8"	4 panels	28 7/8"
120"	4 panels	31 7/8"	4 panels	31 7/8"
132"	5 panels	28 3/8"	6 panels	24 1/8"
144"	5 panels	30 3/4"	6 panels	26 1/8"
156"	5 panels	33 1/4"	8 panels	21 5/8"
168"	5 panels	35 5/8"	8 panels	23 1/8"
180"	5 panels	38"	8 panels	24 5/8"
192"	5 panels	40 3/8"	8 panels	26 1/8"

PANEL SIZE CALCULATIONS

Sliding panels are ordered slightly wider than required to include a 2 1/2" panel overlap allowing for privacy. Reference the table above for panel widths of select track sizes based on the configuration.

To calculate an approximate panel width, multiply the gaps between your panels (the number of panels ordered minus 1) by 2 1/2" (the panel overlap). Add this number to the overall width of your panel track. Then divide that number by the number of panels ordered.

For example: For a 96" one-way panel track, each panel will be approximately 25 7/8" wide.

4 (panels) - 1 = 3 gaps

3 x 2 1/2" = 7 1/2"

96" (ordered width) + 7 1/2" = 103 1/2"

103 1/2" / 4 (panels) = 25 7/8" approximate panel width

All panel measurements are rounded up to the next 1/8".

STANDARD PANEL CONFIGURATIONS

Width	Type of Opening	# of Panels	Track Type
48" - 84"	One-Way	3 Panels	3 Channel
	Center	4 Panels	3 Channels or 2 Channel*
84 1/4" - 120"	One-Way	4 Panels	4 Channel
	Center	4 Panels	3 Channel or 2 Channel*
120 1/4" - 144"	One-Way	5 Panels	5 Channel
	Center	6 Panels	3 Channel
144 1/4" - 192"	One-Way	5 Panels	5 Channel
	Center	8 Panels	4 Channel

*4 panel center opening can be requested on 3 channel (standard) or 2 channel track. 2 channel tracks allow a narrower mounting depth.

TRACK DIMENSIONS

TRACK DEPTHS	
2 Channel	1 1/2"
3 Channel	2"
4 Channel	2 5/8"
5 Channel	3 1/4"

The distance from the top of the track to the top of the panels is 1 7/8". The factory will take account of this distance when calculating the panel length.

PRO DESIGN WOVEN WOOD WARRANTY

LIMITED LIFETIME WARRANTY

This product is warranted against defects in materials and workmanship, provided that:

1. The product was installed according to the product instructions.
2. Pro Design LLC recommendations were followed regarding limitations and specifications of the product.

Pro Design LLC reserves the right to determine if your shade warrants a repair or partial replacement of any parts. If necessary, Pro Design LLC will replace your shade with a new shade of equal or superior value. This shall be your sole remedy under this warranty.

This Limited Lifetime Warranty excludes all motors, controls and accessories, which are warranted for only a period of five years from the date of purchase. Failure to follow the proper installation, charging and use instructions will invalidate the warranty for motors, remotes, wands and hubs.

This Limited Lifetime Warranty applies only to the original retail purchaser with proof of purchase.

This Limited Lifetime Warranty does not cover the removal or installation of original or replacement shades. This Limited Lifetime Warranty does not cover damage or defects caused by, or resulting from improper maintenance, neglect or improper use, wear and tear, abuse, neglect, accidents, alteration, commercial use, installation, removal or reinstallation or exposure to excessive moisture.

YOUR RIGHTS UNDER STATE LAW

These warranties give you specific legal rights. You may also have other rights which may vary from State to State. In no event shall Pro Design LLC be liable for incidental or consequential damages or for any other direct or indirect damage, loss, cost, expense or fee. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. These warranties are exclusive and in lieu of all other obligations, liabilities, disclaimers, or warranties.

! WARNING

! ADVERTENCIA

ANSI/WCMA A100.1-2022

Window Blind Cord Strangulation Risk

Window blinds with a damaged or loose tension device or retractable cord that fails to fully retract pose a strangulation risk to children. To avoid this potential strangulation risk, consider purchasing cordless products with inaccessible cords.

Riesgo de Estrangulamiento en Cuerdas de Persianas

Las persianas con un dispositivo tensor suelto o dañado o con una cuerda retráctable que no se ajusta completamente representan un riesgo de estrangulación para los niños. Para evitar un posible riesgo de estrangulamiento, considere comprar productos inalámbricos o productos con cuerdas inaccesibles.
